

Hyperion Fluorescein

Valeport's Hyperion Fluorescein sensor delivers high performance measurements of Fluorescein (Uranine) in a compact & robust package ideal as a standalone sensor, for ROV and AUV integration or used as part of a multi-sensor array and data logger. Hyperion is compatible with Valeport's EnviroLog and EnviroLog 4G systems.

Offered as standard in a 6,000m depth rated, titanium housing the Hyperion Fluorometer has a wide range (9-28V DC) isolated power supply, data output up to 16Hz and RS232, RS485 and Modbus RTU communication protocols. Hyperion offers an industry leading dynamic range with no adjustment of gain settings required.

Hyperion Fluorometers can be supplied with sensor guards and a shaped anti-snag connector cover. If required a more robust Kevlar weave protected cable can be supplied.
